Applicant's arguments filed 1-23-03 have been fully considered but they are not persuasive.

Double Patenting rejection is withdrawn in light of applicants' properly filed Terminal Disclaimer. Rejections over the prior art are withdrawn in light of applicants' amendments.

Applicant's arguments with respect to claims 1-11 and 16-50 have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 and 16-50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Duan et al.(5,608,000).

Duan et al. discloses aqueous polyurethane dispersions used in the making polyurethane coatings in the presence of solvent and other additives known to the art (see the entire document). Duan et al. differs from the claims in that not every modifier or their respective amounts is recited by its disclosure. However, Duan et al. acknowledges employment of additives known to the practitioners such as thickeners, pigments, and other water based polymers. Accordingly, it would have been obvious to

Art Unit: 1711

have utilized modifying agents for the purpose of imparting their modifying effect in the preparations of Duan et al. in order to arrive at the products of applicants' claims with the expectation of success in the absence of a showing of new or unexpected results attributable to the employment of additives including release agents, propellants, dyes, pigments, filler/thickeners, profoamers, defoamers, anti-skinning agents, antioxidants, surfactants, and plasticizers which all have known and studied effects as additives in preparations of the instant concern.
